

Introducing Model 2412-D

New Dimension Crushers proudly introduces a new and truly revolutionary lighter design rock crusher to the demolition industry. Patent pending technology allows never before seen light weight, low horsepower, portability, elegance of simplicity, and ease of routine maintenance in rock crushing, with the same *wallop* as our heavy duty machines.

Basic Machine Specifications:

Basic Weight w/hopper – 850 pounds (386 kg)
Chamber Width – 24 in (61 cm)
Roll Diameter – 12 in (30.5 cm)
Reduction Ratio – 5:1+
Drive – 20 hp (15 kw)/15-18 gpm (57– 68 l/m)
Hyd. Pressure – 2000-3000 psi (388-241 bar)
Jaw Composition – Cast 4130 Steel
Roll Composition – 4140 Steel
Feed Material Compressive Strength – 30K psi
